Cloud Engineer with **4+ years of progressive IT experience** across Microsoft cloud platforms, infrastructure operations, enterprise technical support, identity and access management, virtualisation and application troubleshooting. Hands-on experience with **Microsoft Azure, Azure App Service, Microsoft 365, Exchange Online, SharePoint, Active Directory and Servicenow**, with exposure to Docker, Kubernetes and CI/CD. Experienced in supporting **cloud and hybrid environments, access controls, monitoring, network services, incident resolution and technical documentation.**

TECHNICAL SKILLS

Cloud & Identity: Microsoft Azure • Azure App Service • Azure SQL Database • Azure Resource Groups • Azure Monitor • Microsoft Entra ID / Azure AD • Microsoft 365 • Exchange Online • SharePoint • Intune • Active Directory

DevOps & Monitoring: Docker • Kubernetes • GitHub Actions • CI/CD • Git/GitHub • Container Registry • kubectl • Application & Platform Logs • System Monitoring

ITSM & Operations: ServiceNow • Jira Service Management • Incident Management • SLA Management • Root Cause Troubleshooting • Technical Documentation

PROFESSIONAL WORK EXPERIENCE

INNOVATE IT | IT Support Engineer – Cloud & Infrastructure | 2025 - present

- Administer and support **Microsoft 365, Active Directory and hybrid infrastructure environments**, maintaining reliable access and day-to-day service availability.
- Manage **identity and access administration**, including user accounts, security groups, permissions, onboarding, offboarding and access provisioning across Microsoft environments.
- Configure and troubleshoot **Exchange Online, SharePoint and Microsoft 365 services**, resolving authentication, access, connectivity and service-related incidents.
- Diagnose and resolve **cloud, infrastructure and network incidents** across TCP/IP, DNS, DHCP, network devices and secure remote-access environments.
- Manage technical incidents in accordance with **SLA requirements**, maintaining infrastructure documentation, troubleshooting procedures and knowledge-base resources.

HCL TECHNOLOGIES | Engineer – Microsoft Cloud Operations Jul 2022 – Apr 2024

- Delivered **enterprise L1/L2 support across Microsoft 365 and Exchange Online environments**, resolving identity, mailbox, access and platform-related incidents.
- Administered **Microsoft 365 user accounts, mailboxes, permissions and access controls**, supporting secure and reliable day-to-day cloud operations.

- Managed end-to-end **user lifecycle activities**, including onboarding, offboarding, password resets, mailbox administration and access provisioning for employees and contractors.
- Investigated complex account and platform issues through structured troubleshooting while maintaining established **SLA and service-quality requirements**.
- Monitored system health and collaborated with specialist technical teams to escalate and resolve higher-complexity incidents.
- Developed technical troubleshooting and resolution documentation to strengthen **knowledge sharing, operational consistency and support efficiency**.

TRUELANCER | Application Tester

Dec 2021 – Jun 2022

- Investigated **web application and API issues**, analysing system behaviour across multiple workflows to identify defects and potential root causes.
- Collaborated with developers to **troubleshoot, track and validate technical issues** through resolution.
- Supported software releases through **functional testing, fix validation and deployment-readiness checks**, contributing to application stability and release quality.

ADDITIONAL EXPERIENCE

MILLENNIUM SERVICES GROUP | Customer Service Representative

| 2024 - present

- Managed **visitor and contractor access to restricted areas**, verifying credentials and following established security and access-control procedures.
- Monitored **CCTV and operational environments**, identifying concerns and responding promptly to security and safety incidents.
- Maintained accurate **incident reporting and escalation records**, coordinating with internal teams and external agencies when required.

EDUCATION

Master of Information Technology
Deakin University | Melbourne, VIC

Jul 2024 - Jul 2026

Bachelor of Technology – Information Technology

2018–2022
